

Mostak Shahariyar

Full Stack Developer · MERN Stack · React · Node.js · MongoDB

Dhaka, Bangladesh | mostakshahariyar18@gmail.com | +880 1761208866
[linkedin.com/in/mostakshahariyar](https://www.linkedin.com/in/mostakshahariyar) | github.com/shahariyar23

CAREER OBJECTIVE

Full Stack Developer specializing in MERN Stack with experience building scalable web applications using React, Node.js, Express.js, and MongoDB. Seeking a Junior Software Engineer or Full Stack Developer role to contribute to production-grade applications while continuing to grow as a software engineer.

EXPERIENCE

Frontend Developer — Weero Digital

Aug 2025 – Aug 2026

Web Development Department

- Working on real project-based frontend tasks under professional supervision, contributing to live web development projects.
- Building and maintaining responsive UI components using React.js, TypeScript, and Tailwind CSS following company coding standards.
- Collaborating with the development team in a remote environment, participating in code reviews and iterative development cycles.
- Gaining hands-on exposure to professional frontend workflows, version control practices, and real-world client project delivery.

TECHNICAL SKILLS

Core Stack	JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, MongoDB
Frontend	HTML5, CSS3, Tailwind CSS, Shadcn UI, Material UI, Bootstrap
Backend	REST API Design, JWT Authentication, Mongoose ODM
Databases	MongoDB, MySQL
Languages	C, C++, Java (basic), Python
Tools	Git, GitHub, VS Code, Postman
Deployment	Vercel, Render, Netlify, Docker (basic), AWS (basic)

PROJECTS

BloodConnect – Blood Donation Platform | MERN · JWT · Nodemailer · Tailwind CSS · MongoDB

Feb 2026 – June 2026

Live: <https://blood-donation-system-ui.vercel.app/>

GitHub: <https://github.com/shahariyar23/blood-donation-system-ui>

- Built a full-stack platform connecting blood donors, hospitals, and blood banks across Bangladesh with real-time donor availability tracking.
- Designed a smart availability engine that auto-calculates donor eligibility based on last donation date (90-day rule) and next available date.
- Integrated third-party blood bank APIs (100+ banks) with an admin-controlled settings layer — enabling or disabling sources without any code changes.
- Built a full admin portal with donor management, hospital onboarding, blood request tracking, and a multi-API blood bank manager.
- Implemented 9 branded transactional email templates and SMS notifications for donation confirmations, OTPs, and password resets.

Mini ATS System – Applicant Tracking System | TypeScript · React · Tailwind CSS · Node.js · MongoDB

Jan 2026 – Feb 2026

Live: <https://mini-ats-system-frontend.vercel.app/dashboard>

GitHub: https://github.com/shahariyar23/Mini_ats_system_frontend

- Built a responsive ATS frontend using TypeScript and Tailwind CSS to streamline recruitment and job application management with modern UI/UX.
- Developed intelligent candidate search and filtering capabilities enabling recruiters to quickly identify and shortlist qualified candidates in real-time.
- Implemented secure JWT authentication and role-based access control supporting separate recruiter, HR, and candidate portal functionalities.

Mess Finder – Student Housing Platform | React · Node.js · Express · MongoDB · Tailwind · Shadcn UI

Nov 2025 – Jan 2026

Live: <https://mess-finder-frontend.vercel.app>

GitHub: <https://github.com/shahariyar23/MessFinder-backend>

- Developed a full-stack marketplace for students to search, compare, and book university-area mess facilities with advanced filtering.
- Implemented JWT-based user authentication, role-based access control, mess listing with search & filter, and a booking management system.
- Built 20+ RESTful APIs with Node.js/Express and deployed frontend and backend separately on Vercel and Render.

Gym Management System | MongoDB · Express.js · React.js · Node.js · Tailwind CSS

Jun 2025 – Aug 2025

Live: <https://gym-frontend-zeta.vercel.app/gym/dashboard>

GitHub: <https://github.com/shahariyar23/gym-backend>

- Built a full-stack MERN application for gym member registration, payment gateway integration, and online sales of gym equipment.
- Implemented secure JWT authentication, CRUD operations, and RESTful API architecture for member and product management.

EDUCATION

B.Sc. in Computer Science & Engineering (CSE) — International University of Business Agriculture and Technology (IUBAT), Dhaka *Graduate: 2026*

CGPA **3.56 / 4.00**

Coursework Data Structures & Algorithms, Database Management, OOP, Software Engineering, Computer Networks

TRAINING & CERTIFICATIONS

2022 MERN Stack Development — Programming Hero (Online)

2025 SQL Database Fundamentals — Digital Leadership Academy

Certificate: Awarded certificate in SQL Database – [View Certificate](#)
